SUMMARY

Product Designer with **5 years 10 months of experience** across FinTech, eCommerce, SaaS, and enterprise platforms. Experienced in product strategy, UX research, information architecture, interaction design, design systems, and complex multi-role product ecosystems. Strong experience designing 0→1 products, operational platforms, lending journeys, marketplaces, and AI-assisted products. Skilled in translating complex business and user requirements into scalable, intuitive experiences through research, prototyping, validation, and cross-functional collaboration.

EXPERIENCE

KrazyBee Services Pvt. Ltd.

UX/UI Designer | Oct 2024 – Present

- Led product design across lending, investments, insurance, and operational platforms, contributing to a portfolio scale of **350 Cr+ AUM**
- Defined UX architecture for secured lending products, including **Loan Against Property**, scaling to **125 Cr+ AUM within one year**
- Designed and launched **Two-Wheeler Loans as a 0→1 product**, owning problem definition, regulatory UX, onboarding, and disbursement flows
- Delivered multiple **0→1 launches**, including Healthcare Plans and Digital Gold SIPs, driving **30,000+ monthly plan sales**
- Conducted UX research and usability validation through user feedback, behavioral insights, stakeholder inputs, and iterative design
- Designed an alternate **customer support ticket management system**, improving CS team efficiency by **25%+**

- Improved IVR and chatbot journeys to improve customer support routing and issue resolution
 - Drove monetisation through contextual bundling of Insurance and Credit Reports within loan journeys, contributing to **22% revenue growth**
 - Built and governed design systems and shared component libraries, reducing training time by **50%** and errors by **75%**
 - Collaborated closely with **Product, Engineering, Business, Risk, and Compliance** teams to deliver experiences aligned with business and regulatory requirements
-

Webkul

Visual UI Designer | May 2022 – Sep 2024

- Designed multiple **eCommerce marketplace modules and extensions** across Magento, Shopify, Bagisto, Odoo, Salesforce Commerce, and WooCommerce
 - Designed custom extensions **from scratch based on user and business requirements**, solving complex marketplace challenges
 - Improved UX across product discovery, checkout, cart management, order tracking, vendor management, and marketplace operations
 - Designed **Multi-Vendor Marketplace, POS, ERP connector, and CRM** solutions across digital commerce ecosystems
 - Defined information architecture, user journeys, navigation, and interaction patterns for complex modules
 - Created reusable UX patterns across different client implementations and platform architectures
 - Collaborated with product managers, developers, and business stakeholders to translate requirements into feasible product experiences
-

Wallicon Pvt. Ltd. (Startup)

UX/UI Designer | May 2021 – Apr 2022

- Contributed to the **0→1 launch of a multi-sided digital commerce ecosystem** connecting customers, dealers, and internal operations
- Designed dealer onboarding and storefront creation experiences supporting **10,000+ dealers across India**
- Designed dealer dashboards for managing orders, sales, customers, and business operations
- Defined the order lifecycle from customer purchase through dealer processing, Wallicon fulfillment, and delivery

- Designed the super admin ecosystem covering dealer management, inventory, warehouse, marketing, customer support, purchase orders, and delivery operations
 - Designed workflows to transition dealers from calls and WhatsApp to structured digital operations
 - Achieved **60% operational adoption within 3 months** of launch
 - Reduced manual operational effort by approximately **80%**
-

ITLH LLP

UX/UI Designer | Nov 2020 – Mar 2021

- Designed the in-house website experience across web and mobile with clear user flows and navigation
 - Translated business requirements into wireframes, prototypes, and high-fidelity UI
 - Delivered an MVP under tight timelines while prioritizing core user journeys
 - Collaborated with developers to ensure accurate implementation
 - Created UI components and visual assets supporting the product experience
-

AI PRODUCT & BUILDING PROJECTS

Hive AI | AI Design System Engineer | Figma Plugin

Enterprise Figma plugin designed to **create, govern, audit, and maintain design systems**.

- Generates native Figma design tokens across **Primitives, Semantics, and Components**
 - Exports design tokens to **CSS, SCSS, W3C JSON, and Style Dictionary**
 - Generates governed responsive components while enforcing design system rules
 - Audits designs for detached styles, unlinked colors, missing Auto Layouts, and non-component UI elements
 - Provides **Auto-Heal** functionality to fix design inconsistencies and generate a **0–100% design system health score**
 - Bridges verified Figma design tokens with frontend development workflows
-

FitOS | Multi-Branch Gym Operating System

An all-in-one operating system connecting **gym owners, branch managers, trainers, and members** through a shared real-time platform.

- Central command for owners to monitor branch revenue, attendance, and staff allocation
 - Branch-level control for managers covering capacity, check-ins, and pricing
 - Trainer workspace for shifts, structured workouts, and 1-on-1 client sessions
 - Digital member pass supporting QR entry, workout tracking, bookings, and membership renewals
 - Real-time synchronization connecting member activity across owners, managers, trainers, and members
-

Quickbite Ecosystem | Restaurant Operations & Delivery Platform

An all-in-one platform connecting **diners, kitchen staff, managers, and delivery riders** through one synchronized system.

- Digital ordering for dine-in, takeaway, and delivery with live order tracking
 - Smart Kitchen Display System replacing paper tickets with digital order queues and urgency tracking
 - Manager controls for order review, preparation monitoring, and dispatch
 - Live menu and stock management connected directly to customer availability
 - Delivery workflows covering rider notification, order claiming, pickup, and doorstep status
-

Vernac | Instant Multi-Language Text Translator

A Figma plugin designed to **translate and duplicate UI designs into multiple languages**.

- One-click translation of text layers across selected design frames
 - Generates localized frames side-by-side on the Figma canvas
 - Supports Indic languages including **Hindi, Bengali, Kannada, Tamil, and Telugu**
 - Selective layer controls for excluding brand names, codes, logos, and other non-translatable content
 - Built-in proofreading and editing before generating final localized frames
-

Vivid Color Palette Generator

A visual design tool that converts images into **structured, usable color palettes**.

- Generates **Dominant, Vibrant, Muted, Contrast, and Mixed** palettes
- Supports HEX, RGB, CSS, HSL, and HSB formats
- Provides swatch locking, selective regeneration, and manual refinement
- Exports PNG, JSON, and CSS variables

- Generates Figma Color Styles directly from extracted palettes
-

Design Arcade | Interactive Figma Gaming Plugin

A collection of playable arcade experiences built directly inside Figma.

- Includes **True or False, Car Race, Catch the Egg, Shoot Balls, and Snake Rush**
 - Includes scoring, difficulty modes, countdowns, game-over states, revives, and pause controls
 - Features an in-game coin and diamond economy with unlockable skins and themes
 - Runs inside an isolated HTML5 Canvas environment
 - Published on the **Figma Community**
-

SKILLS

AI Product Design

AI-Assisted Product Design, AI-Assisted UX Research, AI-Driven Ideation, AI-Assisted Prototyping, AI-Assisted Research Synthesis, AI Product R&D, Prompt Engineering, AI-Assisted Development, Design-to-Code Workflows, Vibe Coding

Product & UX Design

End-to-End Product Design, User-Centric Design, UX Strategy, Problem Framing & Discovery, Interaction Design, Information Architecture, User Journey Mapping, Navigation Design, Scalable UX Architecture, Accessibility-First Design

Research & Validation

User Research, Usability Testing, User Feedback Analysis, Competitive Analysis, Flow Diagrams, Experimentation, UX Metrics, Design Validation

Design Execution

Wireframing, Prototyping, Design Systems, Cross-Platform Design, Mobile and Web Design, Visual Design, Component-Based Design, Interaction Patterns

AI Development & Tools

Gemini, ChatGPT, Claude, Claude Code, Cursor AI, Codex, Google AI Studio, Figma Make, Google Stitch, Midjourney

Design & Collaboration Tools

Figma, Photoshop, Illustrator, Zeplin, Jira, Overflow, Autodesk Maya, Blender, Stakeholder Collaboration, Cross-Functional Collaboration

EDUCATION

BBA – Integral University

UI/UX Certification (Topper) – ITLH LLP

Diploma in 3D Animation & Film Making – Picasso Animation College
